Maternal and child nutrition conference

Tuesday 25 October 2005, King's Hall, Belfast.

Promoting good maternal and child nutrition is vital to improving the health of young families. Those involved in helping parents make informed choices need to ensure they are aware of policy changes and are equipped to empower and support parents to optimise their child's nutrition.

The conference aims to provide up-to-date information on nutrition issues affecting expectant and new parents and will include information on reform of the Food Welfare Scheme and the new guidance in relation to infant weaning. Ultimately it is hoped that professionals and peer groups will benefit from an update on nutrition and that some of the misconceptions about maternal and infant nutrition will be dispelled.

Aim

To update the audience on appropriate current nutrition messages during pregnancy, lactation and early childhood and to raise awareness on the reform of the Food Welfare Scheme, 'Healthy Start', and the new guidelines on weaning at six months.

Potential participants

This conference will be of interest to a range of allied health professionals, including dietitians, paediatric nurses, health visitors and midwives.

Booking

We anticipate that demand for this conference will be high. As places are limited please complete and return the application form by Tuesday 11 October 2005 at the latest.

Cost

There will be no cost to participants for this event.
